

WINDOWS & DOORS

DREAM IT. BUILD IT. WE'LL HELP.

mymada.nl

Hello,

I invite you to familiarize yourself with this document. I am confident that our cooperation will be beneficial and based on long-term relationships. Feel free to contact me.

Pawel Rozanski, CEO & Founder

Since 2015 MYMADA, as a professional dealmaker, specializes in the sale and installation of windows and doors across Netherlands. Join the ranks of satisfied customers who value comfort, safety, and elegance in their interiors.

Our experienced team will help you meet your expectations. Together, we will create a space where you or your clients feel comfortable and secure.

The unchanging principles, appreciated by our customers and partners, include:

- full responsibility for the projects we undertake. Throughout our collaboration, you will have access to an experienced project manager to ensure that we create an offer that fully meets your expectations.
- quick communication - we guarantee efficient communication, which speeds up and streamlines project implementation.
- transparent and consistent collaboration rules.

I invite you to contact us, and I hope it will result in the successful completion of many projects together.

BENEFITS OF COOPERATION

.....

GENERAL CONTRACTORS

- Purchase higher-quality windows at lower prices
- Gain more time for business development
- Reduce the risk of costly complaints
- Receive one contract, transportation, and invoice
- Benefit from measurement and installation advice

.....

DEVELOPERS

- Satisfactory prices compared to the original specification

MYMADA

YOUR COMFORT
IS OUR
STANDARD

DOUBLE PANE WINDOW HR++ STANDARD

HR++ glass is the most advanced type of double glazing. This standard of glass represents an improved version of traditional double glazing and offers significantly better thermal insulation. Additionally, HR++ glass uses a standard noble gas between the glass panes instead of ordinary air, further enhancing insulation quality.

TRIPLE PANE WINDOW HR+++ STANDARD

Triple glazing (HR+++) offers the highest insulation value of all types of insulating glass. The special composition, with a thin coating on one side and an insulating gas in the cavity, ensures that the sun's rays are allowed to pass through and heat is reflected in the house. As a result, heat loss through windows and doors is minimized, resulting in better indoor temperature regulation and significant energy savings.

DREAM IT. BUILD IT. WE'LL HELP.

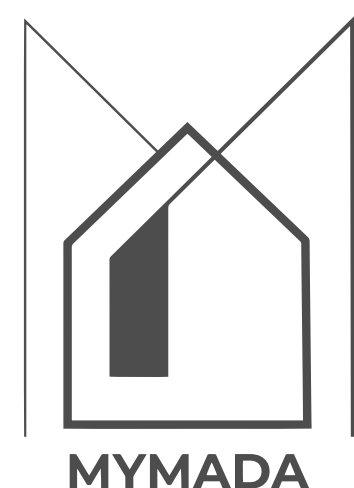

PCV • WINDOWS / DOORS

ADVANTAGES OF PVC DOORS AND WINDOWS

- 🏠 Excellent sound insulation, especially in developing urban areas
- 🏠 Durability and resistance - PVC windows have a life cycle of 30 years or more
- 🏠 Resistance to dirt and environmental conditions. They do not deform under the influence of moisture and temperature differences
- 🏠 Excellent burglary resistance
- 🏠 Attractive visual appearance in various types
- 🏠 Available in countless color variations, laminated on the outside or on both sides. Suitable for both new buildings and renovation of old buildings. Customized to individual requirements

PVC

We are a distributor of PVC windows, striving for innovation and creating high-quality solutions that elevate the architecture of the era. myMADA offers a wide range of individually crafted PVC windows and doors. Our trained team ensures excellent finishing and timely project completion.

We believe in long-term relationships with clients and strive to offer high-quality solutions that satisfy aesthetic and functional needs.

OF HIGHLY VALUED ELEGANT SYSTEMS,
PARTICULARLY ESTEEMED IN THE DUTCH
MARKET.

WINDOW SYSTEM • **ELEGANT 115**

An ideal blend of stylish architecture with modern technology. The Elegant 115 system perfectly complements Dutch architecture. Its slim profile and semi-recessed sash emphasize its classical appearance, while a choice of 50 colors offers extensive styling options for building. With advanced five-chamber technology, the Elegant 115 profile achieves excellent thermal insulation, resulting in high energy efficiency.

Details in the link below.

<https://www.deceuninck.nl/nl-nl?s=elegant+115>

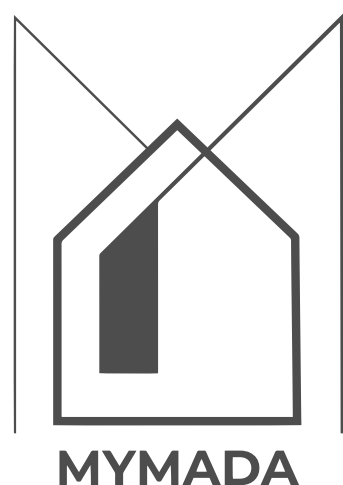

WINDOW SYSTEM • **ELEGANT 76**

Sleek, uncounted sash features a minimalist design with distinct shapes. The frame and sash are reinforced with steel. Like other versions, the profile includes central sealing, enhancing its water resistance capabilities. - technology paired with design. A choice of 50 colors offers extensive styling options for building.

Details in the link below.

<https://www.deceuninck.nl/nl-nl?s=elegant+76>

A modern interior space featuring a large, multi-paned window and a staircase with a dark metal railing. The window looks out onto a lush green landscape with trees. The text "DREAM IT. BUILD IT. WE'LL HELP." is overlaid on the left side of the image in a large, white, sans-serif font.

DREAM IT. BUILD IT. WE'LL HELP.

ALUMINIUM • WINDOWS / DOORS

ADVANTAGES OF ALUMINIUM DOORS AND WINDOWS

- 🏠 Lightweight - aluminum windows are lighter than their wooden and plastic counterparts.
- 🏠 Stability and rigidity - aluminum joinery is characterized by less susceptibility to deformation due to temperature changes than, for example, PVC windows.
- 🏠 Durability - aluminum windows are resistant to corrosion and do not change their properties due to prolonged exposure to moisture or sunlight.
- 🏠 Easy maintenance - aluminum joinery does not require complicated maintenance, although this does not mean that they do not need it at all.
- 🏠 Availability in various color options - aluminum windows can have various finishes, even imitating the structure of wood.

HANSEN MILLENNIUM® MINIMAL FRAME

Aluminum systems Hansen Millennium® successfully replace thin steel industrial internal and external constructions. Windows with slim profiles ensure optimal light and energy penetration. Hansen Millennium® combines classic architecture with modern features, and its minimalist expression with narrow frames ensures maximum utilization of natural light in the building.

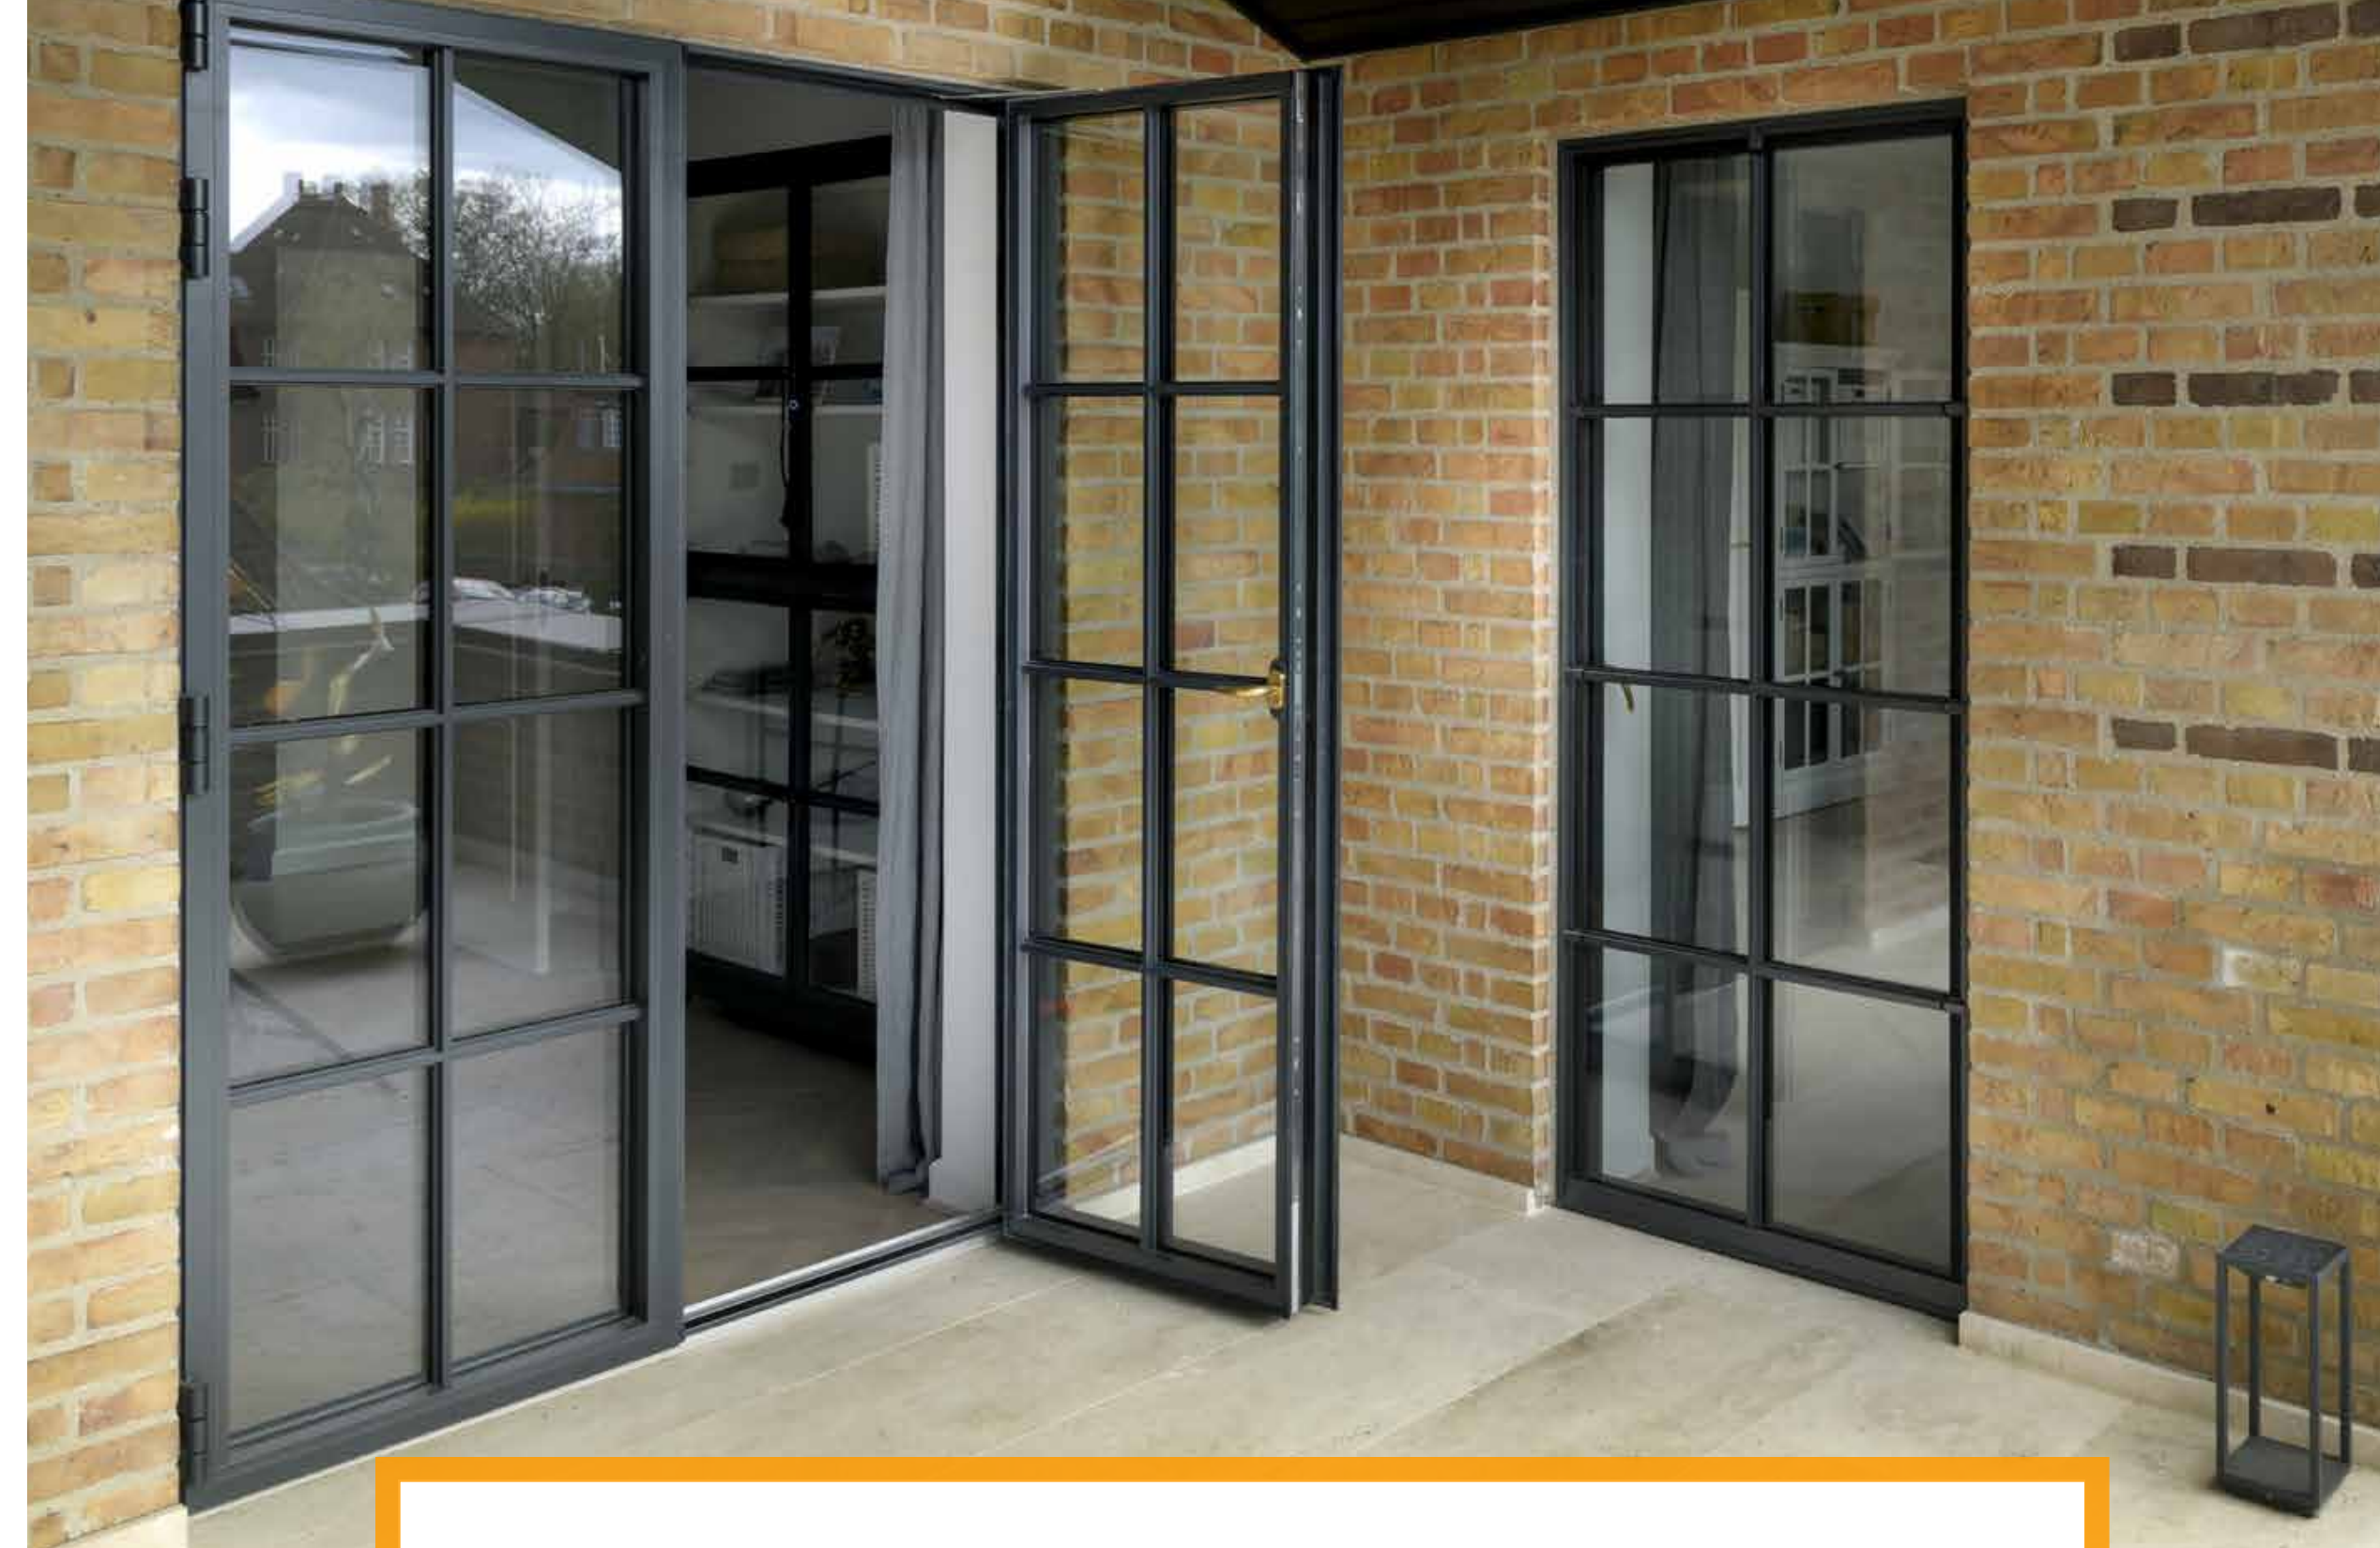

Hansen Millennium® can be used both indoors and outdoors. When installed internally, the profile system is uninsulated and equipped with single glazing.

Hansen Millennium® offers unique solutions with the world's slimmest aluminum profiles for every type of building.

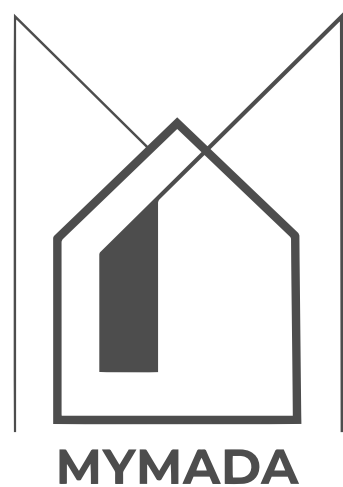

Details in the link below.

<https://hshansen.com/concept/hansenmillennium>

ADVANTAGES - HANSEN MILLENNIUM®

- Extremely slim profiles
- Can be constructed in all shapes, such as right-angled, round or with arcs
- Possibility of two-coloring with difference between interior and exterior color
- Maximized daylight and g-value
- Adjustable, concealed swivel brackets replace visible ventilation grills in the window sill, and maintain the thermal and acoustic insulation
- System with hidden drawbars allows larger spans in facades
- Integrated thermal brake
- Hidden hinges
- Hidden drains
- Hidden openings glued from the factory - fixed fields glasses on site.

The Millennium system includes a wide range of solutions, including doors, sliding doors, windows, fixed elements, and glass façades.

Details in the link below.

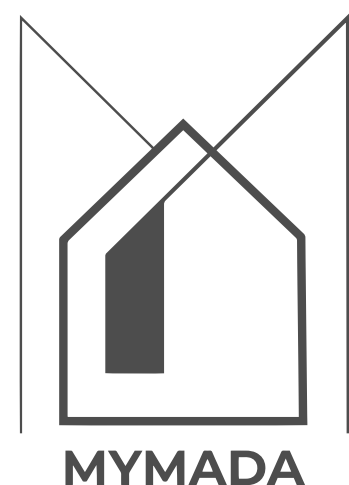

<https://hshansen.com/concept/hansenmillennium>

OUR FLAGSHIP PRODUCT IS A THERMAL INSULATED SLIDING DOOR SYSTEM CHARACTERIZED BY MODERN AESTHETICS, ALLOWING MAXIMUM ROOM ILLUMINATION.

MYMADA MINIMAL FRAME

MYMADA MINIMAL FRAME sliding door systems offer advanced aluminum solutions based on a structure with a thermal break. They are characterized by modern aesthetics allowing for maximum illumination of the room while using the minimum visible aluminum cross-section. The elegant design of the system is based on the combination of large window openings and small frames constituting only 9-14% of the entire structure.

WOOD • WINDOWS / DOORS

ADVANTAGES OF WOOD DOORS AND WINDOWS

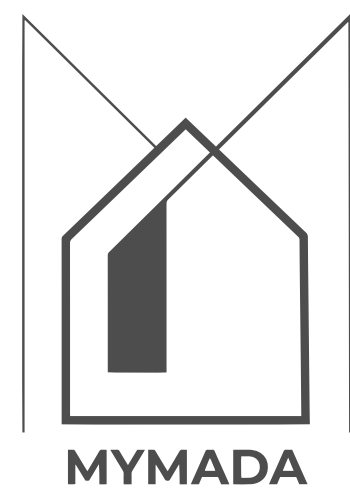

- 🏠 The natural texture, variety of shapes, and colors make wooden windows create a unique atmosphere in any room. Wood adds coziness to interiors and creates a special character of places, making them warm and comfortable.
- 🏠 Wooden windows and doors can easily blend with any decor, whether traditional or modernist. Shapes, dimensions, and finishes can be customized, allowing for the realization of even the most sophisticated projects such as triangular or arched windows.
- 🏠 Wood also represents class and prestige. It is a noble material, and its presence in a building speaks of good taste and attention to detail.

When properly treated and protected, wood is resistant to external factors such as rain, snow, or strong sunlight.

- 🏠 Wooden windows and doors have good insulation parameters, both thermal and acoustic. This means that rooms where they are installed maintain an optimal temperature both in summer and winter.

WE OFFER
COMPREHENSIVE
SOLUTIONS FROM TOP
MANUFACTURERS

Our windows are synonymous with excellent esthetics and modernity, where elegant design combines with advanced technological solutions.

They emphasize the traditional character of architecture, providing exceptional functionality and durability through the use of excellent frames made of exotic maranti wood or reliable oak wood frames.

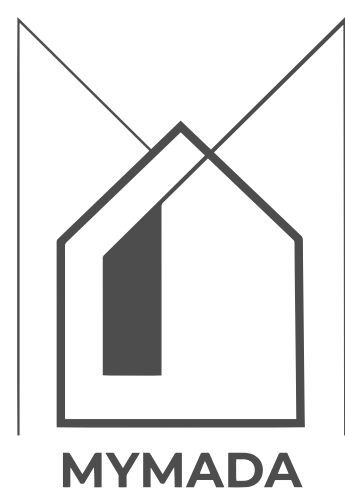

DREAM IT. BUILD IT. WE'LL HELP.

STEEL • WINDOWS / DOORS

ADVANTAGES OF STEEL DOORS AND WINDOWS

- 🏠 One of the main advantages of steel windows is their durability. Steel is a material with high mechanical strength, which performs excellently in operating conditions both indoors and outdoors. Windows made of steel are resistant to various weather conditions such as rain, snow, or strong winds.
- 🏠 In addition to weather resistance, steel windows also feature high resistance to moisture and corrosion. Steel is a fire-resistant material, making steel windows safe in case of fire.
- 🏠 Steel is a flexible and easy-to-work-with material, allowing for the creation of structures in various shapes. That's why industrial steel windows fit perfectly into spaces such as lofts, industrial-style apartments, or modern offices. They are an ideal solution for those seeking unique and non-standard products.

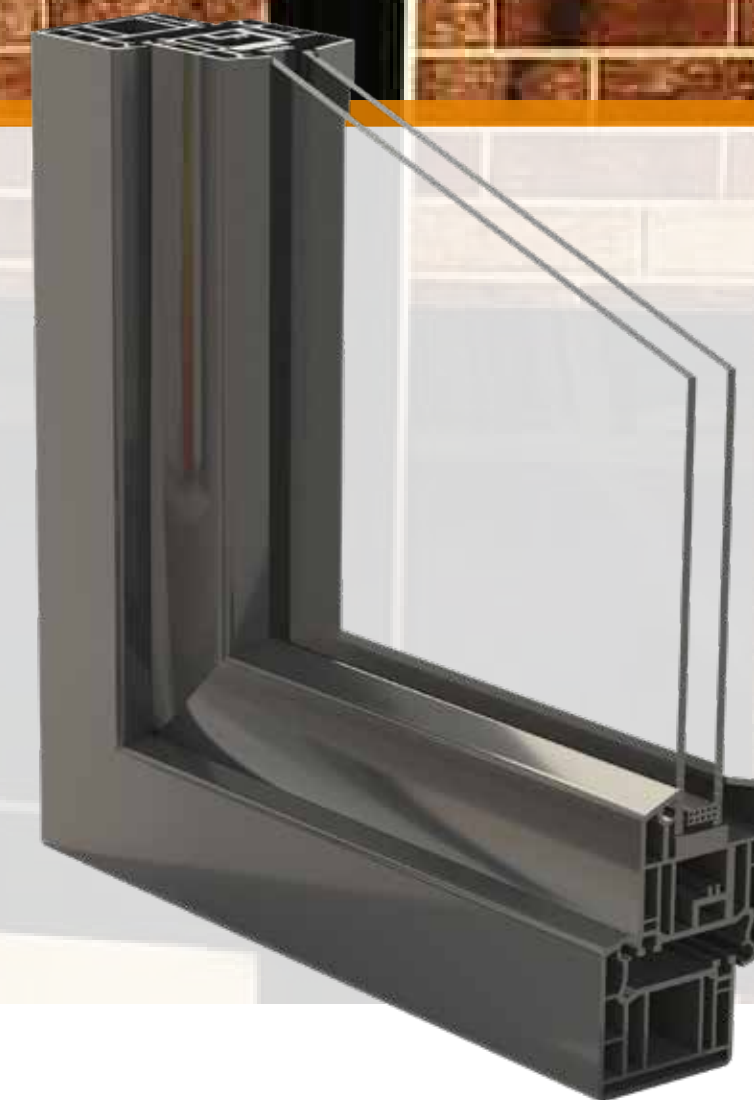

STEEL

MYMADA provides high-quality steel windows and doors, which are the perfect combination of durability and elegance. Steel, known for its strength, ensures reliable protection both indoors and outdoors. The offer of single-glazed internal constructions is based on artisanal elements.

With our wide range of products and experienced team, we guarantee comprehensive customer service, prioritizing their satisfaction and contentment.
